What does KeyHealth offer you?

Most medical schemes give you reasons why you should join them. The irony is that these reasons are almost always the same. At KeyHealth we look at things a little bit differently as we try to keep things as simple as possible. That is why we won't provide you with vague and confusing reasons why you should choose KeyHealth, but rather give you the facts about what you will get if you make the smart, simple choice and join KeyHealth today.

We guarantee that you will get a medical scheme that:

- Is big enough to provide you with stability and the peace-of-mind that your healthcare needs will be looked after properly, but not so big that you will feel like just a number.
- Is financially sound, sustainable and complies with, and even exceeds, the 25% statutory solvency or reserve requirement.
- Has an administration cost component that is much lower than the industry average which means that more money is available to spend on your healthcare benefits.
- Offers you pure and authentic medical cover – in other words, no loyalty programs or frivolous add-ons that you don't need but definitely pay extra for.
- Understands that members are different and therefore provide various ways in which you can interact with the Scheme depending on your preference – these include the traditional ways (e.g. telephone and e-mail) as well as the modern-day tools such as a mobile app, a user-friendly website and an online, real-time chat facility.

It gets even better. We believe it is important to look after all our members and to provide them with innovative products and benefits that will add value to their lives as well as to their pockets. In terms of benefits you are therefore guaranteed to get the following when you join KeyHealth:

Access to the unique, free Easy-ER benefit for all beneficiaries. This should give you peace of mind for those unexpected emergency situations.

Additional preventative care/health screening benefits in excess of R30 000 for the whole family on the Health Booster which will not affect your normal day-to-day and/or savings benefit allocation.

An exciting maternity program for expectant mothers.

A benefit of R1 120 to cover any short payment/co-payment for certain maternity related services. (Refer to Health Booster)

A Disease Risk Management (DRM) program that is designed to improve the well-being of members affected by chronic disease conditions.

Adult dependants under the age of 27, who are studying and in a committed relationship with the principal member, will pay child dependant rates.

If you are diagnosed with a dreaded disease, KeyHealth will allow you to upgrade at any time during the year. This is almost unheard of in industry!

Unlike many other schemes, our dental benefits on all options are in addition to your day-to-day or savings allocation.

So, what are you waiting for? Visit our website at www.keyhealthmedical.co.za or speak to your financial advisor and join KeyHealth today.
